LET'S HELP LIFE TRIUMPH!
Spring 2023. This year spring is different. After a year of confronting great evil, we have become braver, stronger, and more united. We have learned not to postpone life for tomorrow, but to do what is important today – for our country, our loved ones, and our children. This is the principle on which the Foundation stands. Daily systematic assistance to those in need instills confidence in a better tomorrow and a brighter future for our children. I am grateful to our partners for their belief in Ukrainians and Ukraine. Every charitable contribution is a help to thousands of people.

For the Foundation team, it is important not only to provide assistance but also to witness the impact on those we help. It is an incredible feeling when ordinary bicycles or laptops for education bring happiness to children, when parents in foster families have all they need to raise their children, when purchased appliances provide some comfort in temporary housing, and when one of the hundreds of donated generators saves thousands of patients in a hospital.

There is much work ahead of us. We continue to help people in the liberated territories, take care of the restoration of Izium Central Hospital, and do everything to promote family-based care instead of the shameful legacy of the Soviet Union – orphanages. We have chosen a challenging path, but the challenges of today only make us stronger and motivate us to work even harder. The Foundation persists in reminding the world that we need help and continues to appreciate the people who have already provided and keeps providing it. Thank you for your trust and full understanding of the importance of helping Ukraine here and now! Thank you!

The First Lady of Ukraine, Olena Zelenska
The Olena Zelenska Foundation presents to you the new quarterly report. In preparing it, we have consolidated the most important achievements since the beginning of 2023. Daily and systematic work has yielded incredible results. And these are not just empty words - our actions speak for themselves. Behind each number are hundreds of thousands of lives and personal stories of people we have come to know. Together, we have cried, rejoiced, overcame darkness, and made plans for the future. The requests for help continue to grow, and this shared adversity strengthens and unites us.

Russia failed to freeze us with its missile terror. Ukraine endured the harshest winter amidst the roar of generators, and we are proud that we were able to provide hundreds of critical facilities in the de-occupied regions of Kharkiv and Kherson with powerful units. Access to clean drinking water remains one of the biggest problems for residents of frontline cities. The Foundation has provided water purification systems that operate without electricity to several local communities. Izium Central Hospital is an extensive reconstruction project that we continue to support. The housing problem for internally displaced persons is catastrophic. Ukrainians are left without shelter every day, searching for temporary refuge. We have provided thousands of families from de-occupied areas with basic household appliances, heaters, and boilers. Many people didn’t even have their own dishes or bedding, and the Foundation has purchased all of these items for them.

The most painful thing to witness during the war is the situation of children from the de-occupied territories, especially those who have found their families in foster families. Now, they are cramped together in rented spaces, sometimes lacking proper conditions because their native homes no longer exist. Therefore, one of the main tasks of the Foundation is to initiate a housing project for these families. Together with the children from the foster families we have also started dreaming. Soon, we will make one of their biggest dreams come true by organizing a family vacation. I believe that with the support of our partners, everything we have planned will succeed.

With gratitude,
Director of the Olena Zelenska Foundation
Nina Horbachova

ABOUT THE FOUNDATION
THE FOUNDATION RESTORES UKRAINE’S HUMAN CAPITAL.

The Foundation’s core value is people. We stand for everyone affected by the war. We unite the world around thousands of stories of people from Ukraine who need assistance, and step by step, we restore their well-being. We believe that it is people who shape the shared history of Ukraine’s future.

OUR MISSION:

TO PROVIDE UNIMPEDED CONDITIONS FOR A DIGNIFIED LIFE FOR PEOPLE IN UKRAINE.

Every person should feel physically and mentally healthy, protected, and have the opportunity to exercise their right to education and build a future in their homeland.

OUR VALUES:

PERSON-CENTERED APPROACH, TRANSPARENCY, PARTNERSHIP, ACCESSIBILITY

AREAS OF ACTIVITY:

HUMANITARIAN AID  EDUCATION  HEALTHCARE

1.1. SUPPORT FOR FOSTER FAMILIES

The widespread war has deprived people in Ukraine of a peaceful and normal life. Foster families have been particularly vulnerable during the war. Currently, there are 1308 such families in the country. The parents-caretakers of foster families continue to fight for the well-being and lives of the children, despite psychological and material exhaustion, in order to restore the shattered childhood for the children and instill confidence in the future for the adults. The Foundation constantly studies the needs of foster families to provide systematic and targeted assistance.

FOSTER FAMILY STORIES:

In early 2023, the founder of the Foundation, Olena Zelenska, together with her team, visited the Paskovychi foster family in Lviv region. Oksana and Viacheslav, the parents, currently have thirteen children. Until February 24th, the family lived near Kryvyi Rih. There, in Paskovychi, they had a cozy house, a large farm, and their own cheese factory. In March 2022, the family was forced to leave their normal life behind and move to Lviv region. Oksana personally told the First Lady how difficult it was to find housing for their large family. Currently, the Paskovychi family lives in a rented house. Despite this, the parents strive to make their children’s childhood fulfilling. To help them, the Foundation provided them with the most essential household items.

There are still hundreds of foster families in Ukraine that need assistance. The Foundation constantly works with their individual requests. The team communicates with the families and regional authorities before providing assistance. The needs of large families are different and similar at the same time. In the first three months of 2023, foster families needed heaters and generators. During blackouts, these items helped the families endure the most challenging winter for our country, when the terrorist state systematically destroyed Ukraine’s energy system. On the other hand, the children needed laptops and smartphones for their education. Overall, foster families, who urgently evacuated from bomb shelling, currently need everything from furniture, blankets, and pillows to washing machines and dishwashers.
Thanks to cooperation with the foreign partner, the philanthropic division of the European Investment Bank (EIB), by the end of 2023 all 280 foster families in Kyiv, Zhytomyr, Chernihiv, Dnipropetrovsk, Kharkiv, and Cherkasy regions will be provided with everything they need.

Since the beginning of this year 109 foster families from 6 Ukrainian regions have received assistance from the Foundation.

«Since the beginning of the full-scale war, the lives of children in Ukraine have changed dramatically. Our Foundation has done the impossible to evacuate children and children’s homes from the occupied territories. We continue to help them. New needs and requests arise every day. I established the Foundation to provide more effective assistance. Assisting foster families throughout Ukraine and ensuring they have everything they need remains a constant priority for the Foundation. I am grateful to the EIB for supporting the Foundation. Together, we can provide children with dignified living conditions», — said Olena Zelenska, the founder of the Foundation.
The Foundation pays special attention to supporting foster families located near the borders of the aggressor state. The Sumy region is actively shelled by the enemy almost every day, so the lives of the local families resemble more of survival rather than living. Each foster family has its own trials and challenges. Some families have returned from across the border, while others have experienced occupation and are in need of assistance.

Since the beginning of the year, the Olena Zelenska Foundation has helped 8 foster families in the Sumy region, which include 53 children aged between 5 to 18.

Thanks to the Embassy of Switzerland in Ukraine, which has made a charitable contribution and actively cooperates with the Foundation, children now have the opportunity to receive an education, and their parents can create comfort and coziness in their homes. We are grateful to the Embassy of Switzerland for the opportunity to help families with children return to a normal life.

Supporting foster families is one of the priority areas of the Foundation’s activities, personally overseen by the First Lady. The Foundation’s team will continue to provide assistance to foster families affected by the war.
1.2. ASSISTANCE TO RESIDENTS OF THE DE-OCCUPIED TERRITORY OF KHARKIV REGION

Kharkiv region is one of the most affected regions in the country. The enemy has been terrorizing local residents with constant shelling since the beginning of the full-scale invasion. The people here know firsthand what it’s like to be without electricity for weeks, so the need for generators is constant.

Thanks to the charitable contribution of the Temerty Foundation of $500,000 and the support of the Embassy of Ukraine in Canada, the Foundation has helped the residents of the de-occupied territory of Kharkiv region. They were delivered generators, household equipment, and necessary equipment for heating premises and water.

STORIES OF HELP TO THE RESIDENTS OF KHARKIV REGION:

• The community of Vilkhuvatka village in Kupiansk district received a powerful 80kW generator from the Foundation, which now ensures the operation of the water lifting station. Before the full-scale war Vilkhuvatka had a population of over 8,000 residents.

• The Foundation has delivered the most powerful generator to M.I. Kononenko Chuhuiv Central Hospital. The 128kW generator is practically a power station. This device is capable of providing electricity to the hospital which serves over 250,000 people annually. Currently, the generator ensures uninterrupted power supply to the therapeutic, gynecological, palliative, and surgical departments. Now doctors can continue their work despite damage to the region’s power grid.

«During the visit to Chuhuiv Central Hospital, the medical staff shared horrifying stories of rescuing patients during bombings in the partially destroyed hospital. They say it was terrifying for everyone, but they just kept doing their job. I was amazed to see firsthand how much the medical staff has done. They independently transformed the basement into a separate ward with rooms, an operating room, and a maternity ward», — recalls Nina Gorbachova, the Director of the Foundation.
Foundation’s plans: Chuhuiv Central Hospital is a crucial medical institution in the region. The Foundation plans to continue assisting those who are fighting on the medical front day and night. In the second quarter of 2023 the hospital will receive furniture and medical equipment for the traumatology, surgery, and operating departments from the Foundation.

In total, the Foundation has purchased 154 generators for Kharkiv region using funds from benefactors. 75 of them went to educational institutions, hospitals, and critical infrastructure facilities.

TOTAL EXPENSES FOR THE GENERATOR PURCHASE:

15 660 205 UAH
1.3. TEMPORARY HOUSING ARRANGEMENT IN KHARKIV REGION

According to official data, there are currently 419,800 internally displaced persons living in Kharkiv region. Many of them have found temporary shelter in dormitories of local educational institutions. So far 4,093 individuals have been resettled in 48 of these dormitories.

Most of the internally displaced persons have lost their homes and have nowhere else to go. As a result of the bombardment in Kharkiv region the aggressor destroyed 4,091 high-rise buildings and 8,387 private residential houses.

The Foundation constantly assesses the needs of internally displaced persons from the de-occupied territories of the region. Thanks to the charitable contribution of the Temerty Foundation, the Foundation’s team has provided essential support to 13 dormitories in Kharkiv region, where more than 2,000 internally displaced people reside. Using the benefactor’s funds, the Foundation has purchased heaters, boilers, refrigerators, washing machines, and washing machines – everything necessary for the daily lives of the individuals.

STORIES OF PEOPLE FROM THE DE-OCCUPIED TERRITORIES OF KHARKIV REGION:

Anna is a mother of many children from Kupiansk. She gave birth to her youngest child during the bombardment. The woman lost her home due to the merciless war waged by Russia against Ukraine. A shell now lies where her house used to stand. Now Hanna and her children reside in one of the dormitories in Kharkiv, alongside thousands of others in similar situations.

“Our room in the dormitory is far from comfortable. Eating, sleeping, washing, and cooking all have to be done in one room. It’s not easy to do this with young children. We really want to go home”, – Anna shares.
The Foundation helps people like Anna. Currently, the displaced persons from Lozova, Chuhuiv, Kupiansk, and Izyum regions have at least a fraction of the comfort they had before the full-scale war.

The Foundation has purchased for the internally displaced persons from the de-occupied territories of Kharkiv region.

- 151 electric convection heaters
- 29 electric boilers
- 6 electric stoves
- 46 washing machines
- 15 gas stoves
- 14 electric cooktops
- 51 refrigerators
- 10 microwaves
- 71 kettles
- 10 irons

**TOTAL EXPENSES ON HOUSEHOLD APPLIANCES:**

3 111 214 UAH
1.4 ACCESS TO DRINKING WATER FOR RESIDENTS OF FRONT-LINE TERRITORIES

For most villages and towns located near the combat zones, access to drinking water is currently unavailable. In particular, the enemy has completely destroyed or deprived of electricity the water treatment and pumping stations in Donetsk and Dnipropetrovsk regions.

Thanks to the collaboration between the Foundation’s team and the German manufacturer of pumping equipment, WILO SE, the communities in Donetsk and Dnipropetrovsk regions, located close to the border with the aggressor’s army, now have 30 PAUL water treatment stations.

The PAUL system helps produce drinking water in places where it is challenging. It filters water from rivers, lakes and wells, and most importantly it operates without electricity.

21 PAUL systems are currently being used by fearless workers of the State Emergency Service of Donetsk region, and another 9 are being used by the State Emergency Service of Dnipropetrovsk region. Rescuers travel to war-affected areas and provide people with drinking water as needed.

TOTAL EXPENSES FOR WATER TREATMENT STATIONS:

1 455 026 UAH
EDUCATION
2.1. DIGITAL EQUITY FOR UKRAINE: PROVIDING TEACHERS WITH LAPTOPS

For over a year, the sound of children’s laughter has been absent in most Ukrainian schools. Due to the constant threat of shelling, children are forced to learn online. Currently, more than 1,600 schools in the country are damaged or completely destroyed. To ensure that children do not fall behind in their school curriculum, teachers have continued the educational process. They teach children online, conduct lessons in shelters, and some even set up improvised classrooms in their homes. However, not all teachers can organize the learning process due to a lack of technical resources, especially those residing in areas near the conflict zones.

The Foundation’s team takes care to ensure that all Ukrainian children continue their education. We constantly provide teachers from various regions of Ukraine with the necessary equipment for their work. Since the beginning of the year, as part of the Digital Equity for Ukraine project, teachers from the Odessa, Kharkiv, Sumy, and Mykolaiv regions have received laptops with software.

</table>

In the 1st quarter of 2023, a total of 11,378 teachers received laptops.

Laptops for teachers are part of the assistance package from HP and Microsoft, as partners of the “Digital Equity for Ukraine” project. The Global Business Coalition for Education (GBC-Education) initiated the creation of this project with the support of the Elena Zelenska Foundation.

The supply of laptops within Ukraine is provided by GBC-Education in collaboration with the Ukraine House Foundation and the Embassy of Ukraine in the United States.

In total 38,856 Ukrainian teachers from 12 regions will receive laptops along with software.

Last year, as part of the assistance package, the Foundation provided teachers with 16,704 laptops.
2.2. DIGITAL EQUITY FOR UKRAINE: PROVIDING STUDENTS WITH LAPTOPS

The war unleashed by the aggressor deprives Ukrainian students of the right to learn safely within the walls of schools. The Foundation is doing everything possible to make education accessible to students in every corner of the country. Thanks to the support of the Embassy of Ukraine in South Korea, it was possible to provide 500 students with laptops. For the Foundation’s team this support means that more children now have equipment for learning and will not fall behind in the school curriculum.

500 laptops were received by students and children from foster families throughout Ukraine.
HEALTHCARE
3.1. RECONSTRUCTION OF IZIUM CENTRAL HOSPITAL
The Foundation understands the importance of the reconstruction of Izium Central Hospital. It was shelled with rockets, and the enemy destroyed all the main buildings and the maternity ward, looting the medical equipment. Currently, the hospital is only operating at 10%. 150,000 patients are left without medical assistance.

THE FOUNDATION HAS ANNOUNCED A FUNDRAISING CAMPAIGN FOR THE RESTORATION OF IZIUM HOSPITAL, WHICH WILL SAVE HUNDREDS OF LIVES.

IN TOTAL, SINCE FEBRUARY 24, 2022, RUSSIA HAS DESTROYED OR DAMAGED

1500 UKRAINIAN MEDICAL FACILITIES
3.2. REHABILITATION OF CHILDREN AFFECTED BY THE WAR

Every day Ukrainian children witness war crimes committed by the Russian army. Since the beginning of the full-scale war almost 5,000 of them have lost one or both parents. They have witnessed killings, horrifying events involving their loved ones, and have experienced occupation, and more.

The Foundation’s team and Olena Zelenska have had extensive interactions with these children. It became evident that they urgently need psychological support. A decision was made to fund a rehabilitation project in the Gen.Camp children’s camp to help these children overcome grief and pain, learn to live in a new reality, and regain trust in people. The first session of the camp started in April 2023 in the Ukrainian Carpathian Mountains. In total, the Foundation allocated over 4 million UAH for the rehabilitation of children.

The Foundation will continue to provide assistance to children who have become victims of Russia’s armed aggression against Ukraine and will do everything possible to keep the protection of Ukrainian children in the focus of the international community.

FUNDING AMOUNT
4 MILLION UAH
3.3. SUPPORT FOR THE CHERNIHV CENTER FOR SOCIAL AND PSYCHOLOGICAL REHABILITATION OF CHILDREN

The Foundation got acquainted with the work of the Chernihiv Center for Social and Psychological Rehabilitation of Children in March of this year. At that time the facility had already experienced two shelling incidents, which virtually halted its work due to the destruction. Prior to the full-scale war, the Center had been functioning since 2011, providing rehabilitation, socialization, and adaptation to life for over 130 children aged 3 to 18 years annually. These were children from disadvantaged families, orphans, or those deprived of parental care. Importantly, 60-65% of the children returned to their families or found new foster families. Currently, the management is striving to rebuild the Center and restore its operations as quickly as possible.

“Our facility has been almost completely destroyed. Russian terrorists have ruined what we, along with our colleagues, have been working on for over 12 years. The playroom, bedrooms, dining area, medical section, and psychologists’ room are completely destroyed. Fortunately, there were no children in the facility at the time of the shelling and no one was harmed. Now we are reviving the facility from scratch, as only the walls have survived. We have already repaired the roof, floor, and windows. The remaining task is to renovate the interior. All of this requires significant funding”, – said Anatoliy Pysanka, the director of the rehabilitation center.

TRANSFERRED:

- 2 gasoline generators
- 10 tablets
- 2 computers
- printer
- furniture for the dining area (6 tables and 44 chairs)
- vacuum cleaner
- potato peeler machine
- sleeping mats, flashlights, etc.

The Foundation’s team was impressed by the determination, perseverance, and the desire of the Chernihiv Center for Social and Psychological Rehabilitation to return to work as soon as possible. We did not stand aside and addressed the most urgent needs of the facility and the children.
